

Champions & Lean Six Sigma

Lean Six Sigma is most effective when applied throughout all areas of a organisation as an intergrated Management System and methodology. It is much more than a set of problem solving and process improvement tools and it is when Lean Six Sigma is implemented as a Management System that organisations will achieve the greatest benefits.

Lean Six Sigma project Champions play a critical role in establishing and maintaining a Lean Six Sigma Management System to ensure delivery of sustainable and breakthrough results. Champions need to understand the key concepts and methods of Lean Six Sigma. Equally important, they need to understand their critical role in aligning, motivating and managing all elements of the organisation to implement a Six Sigma Management System.

Course Features

- A three-day workshop designed to give participants an understanding of the Lean Six Sigma methodologies and how they are applied within a project.
- Through the use of interactive exercises and SPC software this training includes an overview of modules such as; Process Mapping, Basic Statistics and Graphing, (i.e. types of distributions and descriptive statistical tools), Measurement Systems Analysis, 5S and Visual Controls, Just-In-Time (JIT), Hypothesis Testing, Design of Experiments (DOE) and Total Productive Maintenance.

Key Topics

- The fundamental concepts of Lean and Six Sigma.
- Customer Centred Focus.
- Recognising and understanding variability.
- The role of Champions, methods for selection for Project Leaders and Project Teams.
- The linkage of project selection to the improvement of an organisation's business outcome.
- DMAIC framework and the integration of the tools into a logical format and structured approach.
- Change management, project selection, project management.
- Project measurement and benefits capture.
